

# Polyfoam Liner®

Only the best materials  
with the latest technology

**Polyfoam liner** is a flexible material, compatible with many products. It is chemically and mechanically resistant, making it a versatile product since it can be cut to measurements easily. It can be used in several industries such as floors, carpeting and bottle caps.

In the bottled water industry it is used for Induction Seals:

- Avoids leaks of any kind
- Maintains freshness in the bottle interior
- Authenticates integrity of the product
- Assures consumer confidence
- Prevents contamination in all the supply chain
- Evidences quality of the package and seal

\*FDA approved

Applications for Industry: Nutritional, Cosmetic, Pharmaceutical, Packaging and mainly in the bottled water industry, presented in the following calibers: 0.060", 0.075", 0.090" y 0.125".
