

Only the best materials  
with the latest technology

**Polycarton** is another successful item in our catalog where we continue innovating. It's a highly resistant material, laminated on one side with corrugated carton, and on the other side with Polyfoam.

**Advantages:**

- Excellent choice for the furniture, pottery and glass industries among others
- Excellent cost benefit relation since one need not purchase products individually
- Its dimensions favor the packing and/or wrapping of any product making size an unimportant factor
