

Only the best materials  
with the latest technology

**Polyglobal** offers the latest technology in air retention barriers. While conventional air cellular cushioning materials have a single polyethylene layer, Crystalpack is made with high-tech air retention barriers that guarantee more powerful cushioning and longer air retention than conventional bubbles.

#### Advantages:

- Flexibility- Useful for a wide variety of products
- Clarity- Easy identification of the product after packaged
- Long-Lasting Bubble
- Great resistance to shock, abrasion and vibration
- Excellent choice for heavy and fragile products
- 100% recyclable
- Competitive price thanks to its high performance
